OBJECTIVE | As a frontend developer my goal is to build modern and good maintainable web applications on React, Typescript and Next.js base. Specially motivate me the well-thought user experience, performance optimization and solving real business problems in alone work and team work too.

TECHNICAL SKILLS | **Core:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS
State Management: Zustand, Context API
Tools & Architecture: Nx Monorepo, Git, REST API
Testing: Playwright (E2E), Jest (Unit testing)
Styling: Tailwind CSS, Material UI, Responsive design

PROFESSIONAL EXPERIENCE

ININET KFT. – 2024 – 2026 FRONTEND DEVELOPER

- **Complex B2B/B2C Clientportal and Reseller Dashboard:** Building multiple complex portals from zero, what handle the orders and invoices too. (React, Next.js, Typescript, tailwind, Material UI, Jest, Playwright)
Added value: I builded the complex business logic to a stable Nx monorepo architecture. With playwright (E2E) and Jest Unit tests I provided the high code quality in a critical system what handle financial datas.
- **SPAR – AI Post generator (Enterprise project):** Building a frontend for an artificial intelligence based social media post generator for a highly enterprise client (React, Laravel, Inertia.js, Typescript, Tailwind, Figma)
Added value: Delivering an innovative, user friendly UI, what prove that I can give out quality code what meet with strict enterprise level expectations.
- **Corporate website full rebuild and API integrations:** Full rewrite of outdated website (legacy Vue.js code) on modern stack with integration of the existing backend and API calls (REST API – fetch wrapper) taked from the legacy code (React, Typescript, Tailwind, Adobe XD, Jest, Playwright)
Added value: Significantly improved page speed and Core Web Vitals scores and smooth system integration to an existing architecture.
- **GENEO – corporate website:** Greenfield project, where the website maded in Laravel framework with Inertia.js. The clients can order genetic tests and they can see the results on their own profile. (Laravel, Inertia.js, Typescript, Tailwind, Figma)
Added value: Stable building of a complex user profile system, where the clients see their personal genetic test results transparently. Based on the Figma drafts I maded a pixel-perfect, fully responsive UI, what gives a fast, modern user experience over the Laravel backend with using Inertia.js.

KÖKÉNY BÉLA EV. – 2021 – 2023

PROJECT MANAGER
TRANSITIONED FROM GRISOL KFT.

- Build IT networks and doing smaller system administrator tasks.
- Hardware maintance, install and setup
- Putting together project documentations and coordinate missing documents
- Coordinating daily tasks of a 4 person team

AGRISOL KFT. – 2020 – 2021

PROJECT MANAGER

- Buying and installing office IT equipments, putting together documents for projects and primary keeping in touch with clients, subcontractors and external partners.

DELTA SYSTEMS KFT. - 2016 – 2017
JUNIOR NETWORK PROJECT MANAGER

- Effective communication between departments and partners.
- Participating in highlight projects (eg. OTYS office moving, MVM IT structure, Duna Autó network)
- Making project documentations and coordinating material buying

EDUCATION | RUANDER OKTATÁSI KFT. – 2023
JUNIOR FRONTEND DEVELOPER

- I finished in the best 5% of the class
- Deep knowledge of modern Javascript frameworks and frontend technologies

ATHÉNÉ VOCATIONAL SCHOOL - 2016
IT SYSTEM ADMINISTRATOR

- Network knowledges, Wndows and Linux servers, Active Directory

CERTIFICATIONS | THE ULTIMATE REACT COURSE – 2023
UDEMY

React | Redux | Supabase | Tailwind CSS | User Authentication | Context API | Custom Hooks | Redux Thunk | React Router | Public Libraries | Authorization | React Query | Single Page Applications | State Management

THE COMPLETEJAVASCRIPT COURSE - 2023
UDEMY

- Deeper knowledges about Javascript language and using it in the web development area
- Ability to build real applications, transferring the learned things to practical experience.

THE WEB DEVELOPER BOOTCAMP - 2023
UDEMY

- HTML | CSS | JavaScript | React | Node.JS | Esxpress | Mongoose | MongoDB
- Practical project experience in web development area
- Knowledge from an intensive web developer training

EF SET ENGLISH CERTIFICATE 51/100 (B2 UPPER INTERMEDIATE) - 2023
EF SET

LANGUAGES | English – Limited working proficiency

Hungarian – Native

German – Basic

COMPETENCES | Communications | Team player | Problem solving | Time management | Flexibility

DRIVER'S LICENSE | Category „B” – 2013

HOBBY | In my free time I like hiking and discovering new places. If I am not in the nature, then I focus on my professional developing. I actively follow the newest tech trends and I continuously train myself to stay always up-to-date and so I can be more successful and effective in my work.
